About Us

We Manage the Process. Physicians Practice Medicine.

Electus Management Group is a fully integrated medical-legal management services organization supporting multiple surgical practices and outpatient surgical centers throughout California.

EMG handles administrative and operational functions for all of physicians practices and surgical centers, including but not limited to scheduling, records management, coding/billing, subpoena processing, expert support services, and lien resolution for all entities in one centralized platform, so our physicians can focus solely on patient care.

Experience That Drives the System

EMG's operational model is backed by over 20 years of hands-on experience within the legal field. That experience has shaped systems and processes designed around the real-world demands of injury-related cases, allowing our practices and surgical centers to operate with efficiency, organization, and consistency from intake through resolution.

Physician Independence Matters

Our physicians remain actively engaged in hospital-based and surgical practice, bringing real-world clinical experience to every evaluation and opinion. EMG protects that independence by keeping business operations separate from clinical decision-making, while giving law firms one centralized process for faster care coordination, reporting, records, billing, subpoenas, and lien resolution.

The Electus Difference

- No Clinic Staff or Middleman Dependence
- Centralized Operational Oversight
- Experienced Medical and Legal Field Staffing
- Unified Coordination Across Practices and Surgical Centers
- Centralized Records, Billing, and Subpoena Processing
- Integrated Lien Resolution Across All Entities
- Physician-Focused Operational Infrastructure
- Responsive, Detailed, and Quality Expert Support Services

EXPERT SERVICES

Expert Medical Evaluations

Electus Management Group supports a network of board-certified surgeons and specialists providing expert medical evaluations, narrative reporting, surgical case review, independent medical examinations, plaintiff and defense medical evaluations, and trauma-based medical analysis across multiple specialties.

Operational Support

Electus provides the operational infrastructure, coordination, and administrative support that allows physicians to remain focused on patient care, clinical evaluation, and the accuracy of their medical conclusions. The result is a streamlined and highly coordinated process designed to deliver clear, organized, and medically defensible reporting trusted by both plaintiff and defense firms alike.
